**NOTICE: Applicant please read the following and sign below to complete this application.**

1. Heating and cooling units shall have it's own circuit breaker and means of disconnecting the unit within reach and visible from unit.
2. When a unit is installed in attic the following shall be provided:
  - A. A light at the unit with switch at the access opening.
  - B. Access opening will be as large as the largest piece of equipment and in no case less than 22x36 inches.
  - C. A catwalk 24 inches wide from access opening to the unit, where a 30-inch wide deck is required for servicing the unit with a 36-inch head height.
  - D. A secondary pan of ample size with a ¾ inch rigid drain line run to a visible location shall be installed under the cooling coils.
  - E. Units must be elevated to insure proper drainage of condensate lines.
3. Code violations found when equipment is being changed out shall not be reconnected until all code violations are corrected.
4. This permit becomes null and void if work or construction authorized is not commenced within 6 months, or if construction or work is suspended or abandoned for a period of 6 months at any time after work is commenced.
5. I hereby certify that I have read and examined this application and know the same to be true and correct. All provisions of law and ordinances governing this type of work will be complied with whether specified herein or not. The granting of a permit does not presume to give authority to violate or cancel the provision of any other state or local law regulating construction or the performance of construction.

**The applicant shall not begin work until the permit application is approved and signed by the appropriate City Official.**
