Description: Additional Work

We are pleased to offer the following specifications and pricing to make the following changes:

Demo approx. 60LF of a 3-course parapet wall from the south and east side of the building to allow for the roof to extend to the outer brick edge.

5 feet of the parapet wall to remain at the front south corner to maintain structural integrity at that corner.

Install all necessary wood 2x cap to allow for proper attachment of roof flashings.

Dumpster provided by others.

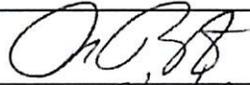

Due to the age and integrity of the existing brick structure removal of the parapet may cause damage beyond the parapet wall. Any damage below the parapet wall will require a change order for additional cost to repair.

After the parapet is removed MBD will investigate the existing wall structure and notify the owners of any concerns we may have regarding the integrity of the wall structure.

The total amount to provide this work is \$19,900.00

If you have any questions, please contact me at (225)313-4912.
